- **Airbrush**
- **Illustration**
- **Performance**
- **Video production**
- **Script & storyboard**
- **Camera operation**
- **Digital video editing**
- **Digital image design**

# Hello!

I produce distinct, diverse and magical artworks and commissions which have been in exhibitions and have found homes in the USA, UK and Latvia (where I am currently based). I also tuition those wanting to learn to draw, paint, master the art of creative expression and self-discovery through visual media as well as host regular activities for kids. Currently, I am in the process of designing an online tutorial service.

Visual art, especially painting and drawing has always helped me to process my thoughts and attitudes. Used in the correct way, art can become a legacy of transformation. Visual codes activate, stimulate and engage the subconscious to perceive inner narratives and serve as a restructuring device for the psyche. Simply put, art with the right intention can move, improve and connect both the artist and the viewer.

I graduated from the University of Dundee with a degree in digital arts and worked in film and TV for 5 years in Scotland and London before moving to my home country to take over a small family run property business. I spent 3 years studying health, wellbeing, and alternative medicine to take charge of my own health and help those around me.

Now I dedicate my time to creating new images and giving regular workshops, my master's degree studies in sociology, property management, active charity work in a non-profit organization and being a mom.
